PROJECTS

Portfolio website

[URL](#) | [GitHub](#)

- Built and published a website to showcase my portfolio and provide a brief outline of my background, skills gained through professional experience, tech expertise and inspirations.

JavaScript Calculator

[Portfolio](#) | [GitHub](#)

- Built a functional and responsive web calculator, which covers the interactions with UI and key JavaScript methods.
- Designed and styled the calculator and output window with HTML and CSS, defined different operations and how they perform in JavaScript.

React – movie search app

[URL](#) | [GitHub](#)

- Built a dynamic React application with movie search function, Movie2See.
- Fetch movie info from IMDb API. Use useState to manage state and useEffect deal with the effect function. Add event listener when user click to search for input movie key words.
- Default webpage displays movie cards of 'CSI' series, users can type in input box and click search icon to find out any latest movies in the market.

React – meme generator

[URL](#) | [GitHub](#)

- Built an interactive React app. The fastest Meme Generator on the planet. Easily add text to images or memes.
- Make API calls to fetch image info. Use useState and event listeners to manage state changing of input text along with image and useEffect to place the side effects function.
- Users can retrieve random meme image with one click and type in input box of any languages to generator memes.

PROFESSIONAL EXPERIENCE

FashionCube

SHANGHAI

Assistant Operations Manager

2020 – Spring 2022
